

Packaging policy 2026

Materials, labelling and disposal

In view of new European packaging requirements, we provide relevant information transparently and centrally. Jongen Werkzeugtechnik GmbH has been registered in the LUCID packaging register since 1 July 2022.

Our principles

- Reduce packaging to the necessary level
- Prefer recyclable materials
- Design material components to be separable where possible
- Provide disposal information digitally
- Handle return enquiries efficiently

Material and disposal guidance

Material / example	Separation guidance	Typical disposal route
Paper and cardboard	Separate from plastics, foam and adhesive tape	Waste paper if clean and dry
PE/PP plastics	Collect by material type where possible	Local recyclable-material collection
Foam inserts	Separate from outer carton and labels	Local recyclable-material collection or waste contractor guidance
Wood	Remove metal and plastic parts	Wood recycling according to local rules
Composite materials	Separate components where possible	According to local waste contractor guidance

Specific disposal routes depend on local and operational requirements. Composition may vary by product and shipping method.

Returns and contact

For questions regarding returns or material composition, please contact our environmental management team.
